

Welcome to MkDocs, Don

For full documentation visit mkdocs.org.

Commands

- `mkdocs new [dir-name]` - Create a new project.
- `mkdocs serve` - Start the live-reloading docs server.
- `mkdocs build` - Build the documentation site.
- `mkdocs -h` - Print help message and exit.

Project layout

```
mkdocs.yml  # The configuration file.
docs/
  index.md  # The documentation homepage.
  ...      # Other markdown pages, images and other files.
```

Last update: 2022-03-09

This looks like a good place to start

Mkdocs Setup Guide

(work in progress)

Install mkdocs

```
pip install mkdocs
```

Create a new project

```
mkdocs new <my-project>  
cd <my-project>
```

See local version of new site

```
mkdocs serve -a 0.0.0.0:8111
```

Initialize GitHub

```
git init  
echo "# Project Description..." >> README.md  
git add README.md  
git commit -m "comments on commit"  
git branch -M main  
git remote add origin https://github.com/leetx1203/<repository-name>.git  
git push -u origin main
```

Update mkdocs.yml

```
site_name: My Docs  
nav:  
  - Home: index.md  
  - Guides:  
    - guides/getting-started.md  
  - setup.md  
  - about.md  
plugins:  
  - search  
  - git-revision-date #pip install mkdocs-git-revision-date-plugin  
  - pdf-export: #pip install mkdocs-pdf-export-plugin
```

```
    combined: true
markdown_extensions:
  - admonition
  - pymdownx.details
  - pymdownx.highlight
  - pymdownx.inlinehilite
  - pymdownx.superfences
  - pymdownx.snippets
  - pymdownx.mark
  - pymdownx.magiclink
  - pymdownx.keys
  - toc:
      permalink: true
repo_name: Github
repo_url: https://github.com/leetx1203/<repository-name>/
edit_uri: '/docs'
theme:
  name: material
```

Deploy to GitHub Pages

```
mkdocs build
mkdocs gh-deploy
```

Visit site

[My site](#)

Tails web wallet

Using Trezor Suite on Tails

Maybe the only the next two steps necessary for accessing the wallet in Tails Trezor Suite

1.

```
sudo /sbin/iptables -I OUTPUT 3 -o lo -s 127.0.0.1/32 -d 127.0.0.1/32 -p tcp --syn --dport 21325 -m owner --uid-owner amnesia -m conntrack --ctstate NEW -j ACCEPT
```

2. Enable Tor in Trezor Suite settings

Copied from (<https://mcudev.github.io/tails-web-wallet.html>) This article presents the handful of steps necessary to get the Trezor web wallet (<https://wallet.trezor.io/>) to work with Tor Browser on a Tails 4.11 Live session.

On the initial Tails setup screen, set an administrative password. This is necessary since root privileges are needed to install the Trezor Bridge package and to set an iptables rule. Once the Tails Live session finishes starting up, setup your network as usual. Open a terminal and run the following commands

```
cd /tmp/  
wget https://keybase.io/stick/pgp_keys.asc  
gpg --import pgp_keys.asc  
wget https://wallet.trezor.io/data/bridge/2.0.29/trezor-bridge_2.0.29_amd64.deb  
gpg --verify trezor-bridge_2.0.29_amd64.deb  
sudo dpkg -i trezor-bridge_2.0.29_amd64.deb  
sudo /sbin/iptables -I OUTPUT 3 -o lo -s 127.0.0.1/32 -d 127.0.0.1/32 -p tcp --syn --dport 21325 -m owner --uid-owner amnesia -m conntrack --ctstate NEW -j ACCEPT
```

Navigate to <https://wiki.trezor.io/Tor> in Tor Browser and follow the instructions to change the Firefox configuration. Since Tails 4.11 uses Tor Browser 10.0, only the configuration for network.proxy.no_proxies_on needs to be set to 127.0.0.1:21325. Connect your Trezor device to the computer's USB port. After unlocking and entering your Trezor's PIN, verify that the udev rules took effect by running `ls -al /dev/trezor*` Start Tor Browser and navigate to <https://wallet.trezor.io/>

Notes

The sha256sum of trezor-bridge_2.0.29_amd64.deb is
51068a4f7dca66c43e5058aa7e89f27110b533b85c0ece074176586065de4dba.

The fingerprint of the key that is used to verify the package signature is
86E6792FC27BFD478860C11091F3B339B9A02A3D.

In the Tails distribution, the `wget` command used above is actually a shell script that configures `wget` to fetch the file over Tor instead of clearnet.

You can run the `lsusb` command from the command line to verify that your Trezor device is recognized by the system.
